

MORGAN SINDALL .

Morgan Sindall & Grontmij recently embarked on a joint venture working with Yorkshire Water. Morgan Sindall were looking to improve the quality, consistency and standards at sites throughout Yorkshire & Humberside. They were continually having problems with their current service provider, poor performance, no management, regular absenteeism to name but a few of the problems. After being introduced and buying into the RFM Group brand, Morgan Sindall awarded RFM Group the daily cleaning service provision to a number of sites in Yorkshire & Humberside.

RFM Group introduced a new method of service delivery to Morgan Sindall, instead of having numerous staff working short shifts in hard to get to locations, the regular absenteeism and service failures were a headache removed from our client by the innovative and creative forward thinking. RFM Group introduced full time operative work schedules, enabling Morgan Sindall to receive a better calibre, more reliable performance from their cleaning service provider.

After a vigorous training programme and the implementation of new systems and procedures, our client can now focus on their core activities and have the peace of mind that they have got their site cleaning provisions in good hands with RFM Group.

Delivering a good service time after time, RFM Group were asked to quote on another Morgan Sindall joint venture. RFM provided a comprehensive, competitive quote and now have further works with Morgan Sindall. No longer only providing daily contract cleaning to the Morgan Sindall group, RFM Group are now quoting and delivering other services such as: M&E works, PAT testing, Catering, Manned guarding etc.

RFM are delighted to be a preferred supplier of such a well recognised business, and are keen to build on the business relationships with our clients at Morgan Sindall.
