

WHITE YOUNG GREEN.

With operations in more than 40 countries worldwide, this highly successful global management and technical consultancy serves the built and natural environment. The Group's head office is in Leeds, and it enjoys all the characteristics and high standards you'd expect from a modern-day global headquarters.

RFM Group was awarded the contract to provide cleaning and security for White Young Green's Leeds office in 2003, after the client felt let down by the service it was receiving from separate security and cleaning companies. The lack of any internal housekeeping and recycling provision was another disappointment that White Young Green hoped RFM Group would address.

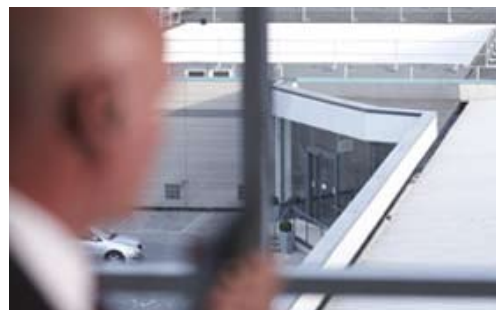

RFM Group supplies White Young Green with a team of 10 fully trained, uniformed and dedicated personnel who clean the offices to the exemplary standards expected by the client. Meanwhile, an on-site housekeeper oversees any daily catering requirements as well as looking after meeting rooms and washroom facilities.

Security has been improved thanks to the presence of trained security guards supplied by RFM Group and working in conjunction with White Young Green's own receptionist. The issue of recycling was also taken care of, and RFM Group has helped its client achieve zero landfill.

On the strength of our work in Leeds, White Young Green has since used our services at additional sites around the UK, always enjoying the benefits that come from having a single point of contact, committed teams of staff and unbeatable standards of finished work.

"RFM Group have fulfilled our facilities requirements since 2003 and have become an integral part of our business, working tirelessly to ensure our offices operate smoothly and efficiently."

Andrew North, Head of Facilities, White Young Green.
